

Rinse and Fill

The Rinse and Fill is an all in one combination filling and sanitation station. The rinse & fill is a very reliable and user friendly station that can be combined with multiple units to accommodate various sized bottling operations. It allows for filling of various sized bottles and containers.

The sanitation processes is executed through a high pressure spray of pure water with highly concentrated ozone injection, killing any biological contaminants in the bottle or container.

The Rinse & Fill can be configured in two setups; 1 sanitizer & 3 faucets or 2 sanitizers & 2 faucets. Additionally, the Rinse & Fill station can be interfaced with additional units to accommodate various bottling projects. This product is currently featured in US embassies around the world.

Features

- High quality stainless steel work table; NSF approved.
- Adjustable storage shelf
- Ozone generator and ozone injection for sanitation
- Electronic push button controls for ozone sanitizing unit (timed or manual)
- 110V 50/60Hz or 220 50/60Hz operation. Please specify when ordering.
- Size: 60"L X 30"W X 58"H
