

# Window Vending

The WindowVend is a compact, convenient Water Vending unit that installs easily into a window, wall or kiosk.

The unit is coin operated and can be accessed from inside the store through a lockable rear cabinet door.

This self-service system gives your customers 24-hour access to premium fresh water, 365 days a year.

The WindowVend unit is an investment with an unlimited profit potential you cannot afford to pass up.

The Dual Station Window Water Vending unit is a great option for those looking to incorporate multiple filling stations. This system can also be installed in a window or exterior wall.

Each filling cabinet in the unit can be plumbed separately to offer different types of water (purified, alkaline, ionized, etc.).

A coin mechanism is included and there is the option to add a dollar bill and credit card acceptor.
