

Rinse and Fill

The Rinse and Fill is an all in one combination filling and rinsing station. The rinse & fill is a very reliable and user friendly station that can be combined with multiple units to accommodate various sized bottling operations. It allows for filling of various sized bottles and containers.

The rinsing processes is executed through a high pressure spray of pure water with highly concentrated ozone injection, killing any biological contaminants in the bottle or container.

The Rinse & Fill standard configuration is 1 rinse & 3 faucets. Additionally, the Rinse & Fill station can be interfaced with additional units to accommodate various bottling projects. This product is currently featured in US embassies around the world.

Features:

- High quality stainless steel work table, NSF approved
- Adjustable storage shelf
- ClearWaterTech CD325 Ozone generator and ozone injection for rinsing
- Electronic push button controls for ozone rinser .325 Grams Per Hours unit (timed or manual)
- 110V 60Hz or 240V 50Hz operation (specify when ordering)
- Size: 60"L x 30"W x 58"H
- Crated Dimension / Weight
- 64"L x 34"W x 22"H / 220LBS
- Packed Flat For Shipping
